

Occupational Health, Safety and Environment Policy

As a polyethylene and polypropylene film producer, Bareks A.Ş.'s fundamental policy is; to realize its processes with the sustainability principle, environmental responsibility and the target of "Zero Harm Safety".

As Bareks A.Ş., our main responsibility and aim is to work as a team philosophy with the participation and support of all our employees, employee representatives, suppliers and customers, to ensure its sustainability by creating a safe, peaceful, clear, ergonomic and healthy environment and to raise awareness of all our stakeholders and to include them into our goal while developing with the principle of continuous improvement.

The points that our organization strongly emphasizes are; to identify the hazards and risk factors which may affect the Environment and Occupational Health / Safety and to ensure their reduction and elimination as well as to identify the opportunities that may occur, to reduce, prevent and separate the wastes at their source, to minimize the use of natural resources and unnecessary usage, to decrease carbon footprint, to use renewable energy sources and to follow industrial and technological innovations by considering the effects on Environment and Occupational Health / Safety in new investment needs.

Acting with the awareness that natural resources are limited, our organization aims at "Zero Pellet Loss" by developing principles to prevent the spread of raw material pellets subject to the process, wastages generated in each process

steps, raw material dust originating from the process to the environment. Within this scope, our organization determines its clear targets to prevent pellet loss, establishes procedures that determine the operation of the system at all control points, and organizes trainings for its employees in this direction, always focusing on development.

In line with these principles, Bareks A.Ş. undertakes to fulfill legal regulations as well as all other requirements while performing all its activities.
